

MANUFACTURER AND INSTALLER OF SEAMLESS,
CLEAN FLOOR SOLUTIONS FOR
SEMICONDUCTOR FABRICATION PLANTS

STONHARD[®]
EST. 1922

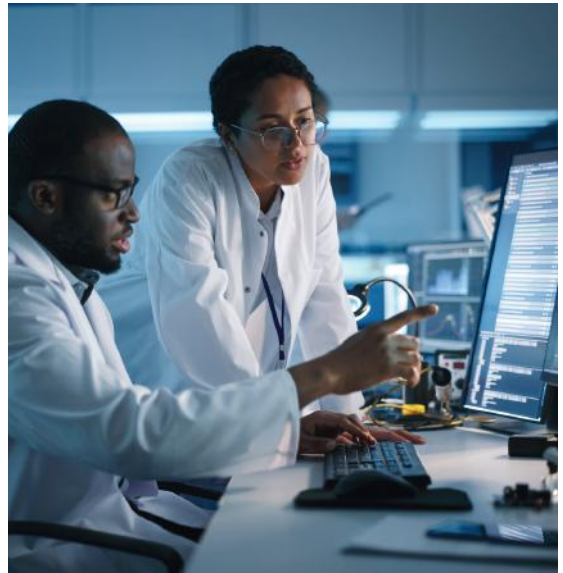

CLEAN,
EASY-TO-MAINTAIN
SOLUTIONS FOR
EVERYWHERE YOU
HAVE FLOORS

Your Stonhard sales expert will guide you through the product selection process.

We have a century of experience solving customers' problems. We provide product recommendations, design support, project management and we take responsibility for both the products and the installation. This means you work with Stonhard directly from project start to completion. Our work spans both industrial and commercial spaces, delivering floor solutions that meet both performance and design requirements.

STONHARD SOLUTIONS FOR SEMICONDUCTOR FABS

CONTAMINATION AND DOWNTIME,
WE HAVE SOLUTIONS FOR BOTH

Seamless, safer, clean floors are the only option for semiconductor environments. Our poured-in-place, hygienic floor solutions, ranging from coatings to multi-layered systems are designed to protect chip manufacturing environments against contamination. Low VOCs and ultra-low AMCs. They are impact and abrasion resistant and most of all, chemical-resistant to stand up to chemical spills and stains and keep dust from compromising chips and wafers. And we don't stop there. We repeatedly test our products, as well as our competitor's products so we know our floors outperform the rest.

Downtime is a big problem. We get it right and install the right solution so you don't have to stop production due to problems or floor repairs. Your facilities runs all day every day. Who can afford to lose value production time? And if you're building a new facility, we work with your timetable to get the work completed and meet your deadlines.

THE STONHARD DIFFERENCE

A century solving customers' problems, one point of contact, direct sales with complete design support, project management, technical support and global accounts. No matter where you are in the world, the end result is the same - consistent products and installation.
